

CLEANING & MAINTENANCE MANUAL

IMPORTANT!

- Only follow the instructions mentioned here, and not any others which may be supplied to you.
- Before using the floor, remove any protective coating which remains from the manufacturing process, with a post-installation cleaning. This protective coating is only for the sake of preventing damage during transport and retail.
- All the recommended products are manufactured by Diversey, our cleaning and maintenance products partner. You can find a full global list of their local resellers at the following link, so that you know how to access these products within your market: <http://www.pavigym.com/maintenance.php>
- Should you have any questions about these cleaning products and their applications, please contact our **Customer Service** department: customer.service@pavigym.com

OBLIGATORY POST-INSTALLATION CLEANING.

Immediately after installation and before first use of the flooring.

Product 1st step: Jontec Best.

1. Mix a bucket of water with Jontec Best. The proportion should be 200ml Jontec Best for every 1L of water.
2. Apply the solution on the floor using a broom with medium strength bristles or a scrubber drier (see recommended material below).
3. Allow the solution to act for 20 min without allowing it to dry.
4. **IMPORTANT:** Rinse well with clean water and a microfiber mop or a scrubber drier as many times as necessary to ensure the elimination of the protective coating layer. If this is not done, the surface may be slippy.
5. Leave to dry completely.

Product 2nd Step: Jontec Tensol

1. Mix a bucket of water with Jontec Tensol. The proportion should be 100ml Jontec Tensol for every 1L of water.
2. Apply the solution on the floor using a clean mop or a scrubber drier.
3. Leave to dry completely.

MAINTENANCE CLEANING.

For daily use.

Product 1st step: Jontec Tensol.

1. Mix a bucket of water with Jontec Tensol. The proportion should be 25ml Jontec Tensol for every 1L of water.
2. Scrub the surface with the solution using a mop or use a scrubber drier (see recommended material below).
3. Leave to dry completely.

DEEP CLEANING.

For intensive cleaning (should be performed between a minimum of twice and a maximum of ten times per year).

Product: Jontec Forward.

1. Mix a bucket of water with Jontec Forward. The proportion should be 50ml Jontec Forward for every 1L of water.
2. Apply the solution on the floor using a mop or a scrubber drier.
3. **IMPORTANT:** Allow the solution to act for a short period without allowing it to dry. An incorrect mixture concentration could cause damage to the surface after drying.
4. Scrub the solution on the floor using a broom with medium strength bristles or a scrubber drier (see recommended material below), and remove the dirty water using a mop or liquid vacuum cleaner.
5. Rinse with clean water as many times as necessary to ensure the elimination of all dirt.
6. Leave to dry completely.

SELECTIVE CLEANING.

Stubborn dirt, specific stains...

Product: Sprint Performer or Sprint Spitfire

Apply the product to a cloth, and scrub the surface until all stains have been eliminated. Wipe clean.

In case of **tough stains:**

1. Spray the product directly on to the surface.
2. Allow to act for approx 5 mins.
3. Scrub and wipe clean.
